15	700389PV	Bogie	2	
16	72005A	Details set	1	

This model has been crafted in Italy by ViTrains in OO gauge. A powerful 5 pole motor is installed for precise & realistic operation. Fine detailed features ensure maximum realism and authentic liveries and graphics replicate precisely the original prototype down to the smallest detail. Quality control throughout the production process has been closely monitored to deliver a high quality premium product. A full range of spare parts is available to ensure that your loco can be maintained in perfect running order.

### MAINTENANCE

It is strongly recommended to periodically clean all wheels with a linen cloth moistened with light degreaser. Gears should be lubricated only with special greases designed for plastic synthetic materials.

Follow the diagram to fit the components and lamp hooks A,B C to the nose ends. (Picture 1)

To remove the body - gently ease the body side out in order to disengage the lateral grooves on the chassis. (Photo 2)

This locomotive has been factory prepared for Digital decoder fitting. Remove the body and take the plug out as illustrated in photo 3. Insert the decoder as shown in photo 4. Always refer to the decoder instructions before assembling.
